

Adding Solar and Donating Credit to Empower Energy Charitable Trust

Kia ora koe,

Empower Energy Charitable Trust is a reputable charity dedicated to promoting renewable energy and providing energy assistance to those in need. I would like to express our sincere interest in partnering with you to explore the possibility of adding solar panels to your building and donating solar credit to our charitable cause.

As you may already know, solar energy is a clean and renewable source of power that can significantly reduce greenhouse gas emissions, lower electricity bills, and contribute to a more sustainable future. However, what you may not know is that solar energy can also be a powerful tool in the fight against energy hardship.

Many low-income households struggle to pay their power bills, especially during extreme weather conditions. This can lead to difficult choices between paying for food, medicine, or other essentials. Empower Energy Charitable Trust has developed a unique program that uses the surplus energy generated by solar panels to provide financial relief to these power poor homes.

When you donate surplus solar energy to our organization, it is converted to cash and used to pay a portion of power bills for power poor homes. This can help reduce the financial burden on these households and improve their overall quality of life. Moreover, we are pleased to inform you that donations made to Empower Energy Charitable Trust are eligible for a tax credit.

Empower Energy Charitable Trust is a reputable charity with a strong track record of promoting renewable energy and assisting those in need. We are committed to transparency, accountability, and social impact, and we will work closely with you to ensure that the solar installation and surplus credit donation process is seamless, efficient, and mutually beneficial.

We believe that your participation in our solar and surplus credit donation program would be a win-win situation for both your building and our charitable cause. By installing solar panels on your building and donating surplus energy credit to Empower Energy Charitable Trust, you can help combat climate change, reduce greenhouse gas emissions, provide financial relief to power poor homes, lower your own power bills, and receive a tax credit.

We would be delighted to discuss the details of this partnership further and provide you with comprehensive information about the benefits of solar energy, surplus credit donation, tax credit eligibility, and our organization's work.

Thank you for considering our proposal. We look forward to the possibility of collaborating with you to make a positive and lasting impact on the environment and the community. Please do not hesitate to contact us at your convenience to discuss this opportunity further.
