

White Label Empower Energy Community Energy Distribution Platform

Kia ora koe,

Empower Energy is proud to present our innovative “White Label” Distribution Platform for Communities. This program is designed to provide communities with a sustainable, affordable, and reliable source of power while generating cash flow for local organizations.

Our program utilizes a community solar model, which enables a solar array to be installed on a shared space, such as a community centre, marae, church, or school. The electricity generated by the solar array is sold to the grid and the cash is pooled and then some or all distributed to pay power poor homes power bills directly, and alleviate energy hardship.

Empower Energy's “White Label” Solar-Cash Solution enables local organizations to brand the program as their own and generate revenue while promoting renewable energy and helping their community. We work closely with local organizations to customize the program to their specific needs and goals, ensuring a seamless and successful implementation.

Our White Label Solar Cash Solution can benefit communities in numerous ways, including:

- Reducing energy bills and alleviating energy hardship
- Providing a sustainable and reliable source of power
- Generating revenue that can be reinvested in the community
- Promoting renewable energy and reducing greenhouse gas emissions
- Enhancing the reputation and visibility of local organizations

Empower Energy Charitable Trust is a reputable charity with a strong track record of promoting renewable energy and assisting those in need. We are committed to transparency, accountability, and social impact, and we will work closely with you to ensure that the solar installation and surplus credit donation process is seamless, efficient, and mutually beneficial.

If you are interested in learning more about our “White Label” Distribution Platform for Communities, please do not hesitate to contact us. We would be delighted to provide you with comprehensive information about the program and discuss how we can customize it to meet your specific needs.

Thank you for your consideration, and we look forward to working with you to promote sustainable and resilient communities.
